Abstract

© MCSER-Mediterranean Center of Social and Educational Research. Proposed instruments used to measure inequality in living standards in five CIS countries: Azerbaijan, Belarus, Kazakhstan, Russia and Ukraine. Compared countries in the aggregate represent most of the economic and human potential of community; In addition, a number of them are consolidated with each other with deeper forms of integration. Currently differentiation of incomes of the population estimated by the traditional factors (index- numbers): funds and Gini, which is determined by socioeconomic inequality.
